Ref: Status Report on Dellar Landfill Closure Plan

Dear Mr. De Frate:

The last status report was submitted on January 30, 2009. From February 1, 2009 to April 30, 2009, the following tasks have been accomplished to address the Corrective Action Order for the Dellar Landfill issued by the Central Valley Regional Water Quality Control Board:

1. An inspection of the Dellar Landfill by the Water Board was completed and Water Board staff on site said they were recommending the site was found to be in compliance. No written report has been received to date. There was some discussion of the Engineer Drawings submitted for review and it was agreed drainage may be an issue. The City has met with SCS Engineering, the consultant completing the drawings and has discussed the concern over drainage and finished slope.
2. Approximately 60,000 cyds of fill material has been stock piled on the site, with an additional 240,000 cyds of fill material stock piled on the 28<sup>th</sup> Street Landfill to complete the closure work in the summer of 2010.
3. Ongoing monitoring after storm events is occurring to inspect for erosion and maintenance of the stock pile is being addressed.
4. The final closure plan is being completed and will be submitted to the Water Board by May 12, 2009, as required.

Making a Difference in your Neighborhood

5. Funding for the closure work has been identified and a CIP is being created to pay for the estimated closure cost at this time.
6. An additional 60 cyds of clean soil was stock piled on site and will be stored for use when construction work begins in the summer of 2010.

Sincerely,

A handwritten signature in black ink, appearing to read 'Marty Strauss', written over a horizontal line.
